DETAILED ACTION

Upon further consideration, the following restriction requirement is deemed necessary.

Any delay in examination is inadvertent.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

SOLDERING PROCESS:

Species I: claims 3-4 and 9, reflow soldering.

Species II: claims 5-6, wave soldering.

TYPE OF COMPONENT:

Species A: claims 7, 11 and 14, solder ball or surface mounted component.

Species B: claims 8 and 10, PIH component.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species **(one Species from soldering process (Species I or II) and type of component (Species A or B))** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims that are recited in the species are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3729

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Due to the complex nature of the election of species requirement, no telephone call was made to the attorney of record to request an oral election to the above requirement.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

4. **Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**
